

Ontrack® DataAdvisor™

Consolidated and easy catalog management of legacy backup tapes

Ontrack® DataAdvisor™ provides a time and cost-effective solution for managing your legacy backup tapes. Ontrack DataAdvisor eliminates the need to maintain unnecessary backup systems and offers an online catalog view of your legacy tape libraries. When transitioning to a new backup software or consolidating tape archives, Ontrack DataAdvisor allows you to fully understand your archived data.

Features

- Consolidate legacy backup catalogs from various systems and mediums into a single, easy-to-view inventory
- Quickly search and browse sessions within a catalog
- Easily generate catalog reports
- Host catalogs in a secured environment
- Access Ontrack DataAdvisor online with a personal and secured customer login

Benefits

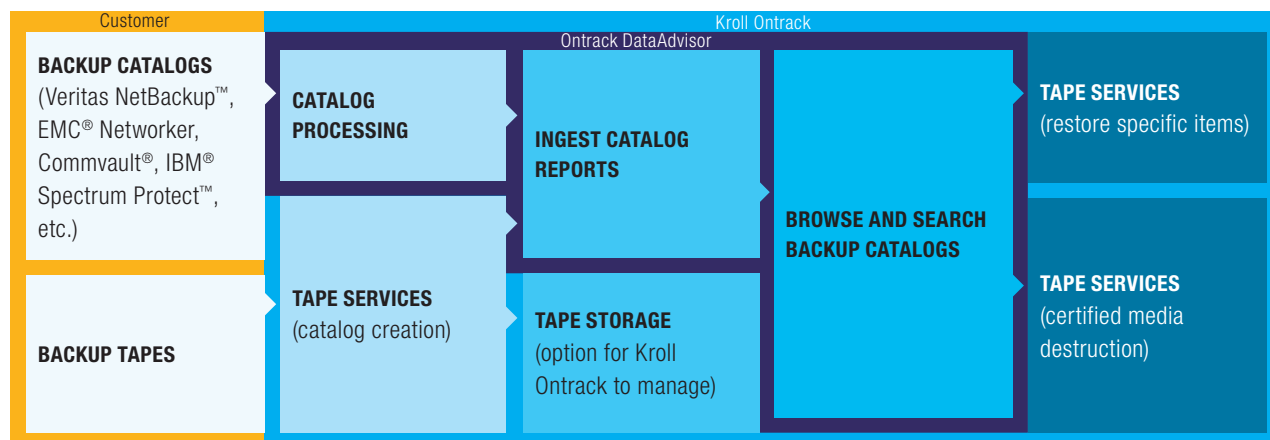

- Full knowledge of information contained on legacy backups
 - You know what data exists in your enterprise and where it resides
 - You make informed decisions around the data you need to retrieve and migrate
 - You know what data needs to be kept for business, litigation and compliance and can dispose of unneeded data
- Reduce the cost, time and risk of maintaining unnecessary legacy backup systems
 - You can phase out and decommission legacy systems and reduce the risks associated with improperly storing or destroying information
 - You have quick access to the specific data needed for compliance, investigations and litigation
 - You lower information risk at an enterprise level

How it works

We help you collect catalogs from your backup server or create them from your loose tapes

We ingest your catalogs into Ontrack DataAdvisor

You review your backup catalog online with Ontrack DataAdvisor and create restore requests

Ontrack DataAdvisor Backup Formats and Versions Supported
