Ontrack offers secure, environmentally friendly data erasure and media disposal services for end-of-lifecycle hard drives and other storage media. Our process has several benefits:

1. Environmentally friendly - prevents metals and other materials from reaching landfills
2. Removes the risk of having sensitive data fall into the wrong hands

Ontrack technicians will use a degaussing (erasing) device that uses a strong magnetic field to destroy all traces of electronic data on the storage media and renders the storage media unusable. After the data is erased, the technicians will recycle the media in an environmentally friendly manner.
